

Jeff Bruno conducts evaluations of damages in order to determine the functional as well as the economic implications of physical and cognitive injury, for plaintiff and defense.

Services provided include:

- Disability Analysis
- Earning Capacity Assessment
- Rehabilitation Planning

CLIENT-DIRECT SERVICES

- Disability Analysis, via:
 - Functional / Work Capacity Evaluation
 - Independent Living Evaluation

Determine real-world functional abilities via a dynamic battery of clinical exams, work/activity samples, situational assessments, and performance-based tests. Assess physical, psychosocial, sensory, and cognitive capacity – as well as the context in which tasks are performed – simultaneously and in equal detail. Determine degree of functional autonomy, rehabilitation potential, and work/living restrictions.

- Earning Capacity Assessment, via:
 - Transferable Skills Analysis
 - Evaluation of Vocational Potential

Determine vocational potential and employability via job-demands and labor-market analysis. Assess general-worker as well as job-specific performance capacity required for job seeking, acquisition, and success. Determine work-life expectancy as well as future and/or loss of earnings.

- Rehabilitation Planning, via:
 - Evaluation of Rehabilitation and Care Needs
 - Cost-of-Care Projections

Determine appropriate format of supported-living, return-to-school, and/or return-to-work services. Assess products and assistance needed to promote independence and to prevent complications or deterioration. Determine cost of supports and care across the lifespan or career.

CASE-CONSULTATION SERVICES

Review/Critique

- Records Review and Interpretation (including of surveillance/documentary video)
- Critique of Disputed Report Findings

Analysis/Guidance

- Job Demands and Labor Market Analysis
- Adaptive Equipment/Rehabilitation Engineering Guidance
